Subject: Diesel exhaust

Here I sit with my case of covid 19, like so many others, current cases 67. I cannot understand how the Assembly can keep throwing out these mandates to help protect our health but in the DIREST TIME OF PETERSBURGS RECENT HISTORY, the borough would turn on those polluting diesel generators to spew that crap into the air and take away even more of our desperately needed oxygen. I was going onto my porch every day to get some much-needed fresh air, but today when I went out, I about choked on the exhaust from those generators. I also live close enough that it gets into my home anyway.

Sick and trying to breath in Petersburg
