I know what you think of me and the people who think like me. Sadly that's the majority of the people that you are supposed to serve. Our hospital is currently testing vaccinated people to inflame the numbers then openly blaming people who want to go about their lives and not be told by the hospital that they should hide in their homes any more. If you use this as an excuse to further disrupt the lives of the citizens of this community and our economy. Then you have completely disconnected from reality and are entrenched in your radical beliefs. That you're a poison and therefore need to be removed. The simple truth is this virus is 99.8 percent survivable if you are under 70. That's coming from the cdc website. If you choose to ignore that then you ignore simple logic and you are a lunatic and need to be unseated. We literally have 4 to 5 people interfering in our lives and our community at the behest of a monetarily motivated institute. Its so corrupt on its face it's laughable if it wasn't so tragic! Our hospital has pilfered away 16 million dollars off of our freedom due to Covid! Your all complicit and we will remember when the dust settles

Voter and who you're supposed to listen to before you've made up your mind. Also who you're supposed to work for.
