Subject: in support of all 3 Covid related draft mandates on tonight's agenda

Assembly Members,

Since I am having to type this one handed due to an injury, I am going to keep it short.

I fully support all three Covid 19 related draft mandates before you tonight to protect the health of Petersburg residents. I firmly believe these are minor inconveniences that are required to protect our community. The more stringent precautions we take now will significantly reduce the possibility of a major outbreak and the sooner we can get back to normal. Wearing masks is such a small gesture that can yield big rewards to protect all of our residents. We need to heed the advice of our healthcare professionals in guiding us through these challenging times. Our health is of paramount importance during this pandemic.

I urge you to adopt all three draft mandates on your agenda tonight.

Thank you for your consideration.
