

Memo

To: Steve Giesbrecht, Borough Manager
From: Sandy Dixon, Fire/EMS Director
Date: November 1, 2017
Re: Federal Signal Corporation Sole Source Award for two all-hazard Sirens

The Borough was awarded and accepted a 2016 NOAA Tsunami Hazard Mitigation Program Grant (20NOAA-GY16) for \$56,000 to purchase and install two (2) all-hazard warning sirens. We received a quote from Federal Signal Corporation for \$55,689.33 to purchase and install two all-hazard sirens.

Per Borough Code 4.04.080 (A) I am recommending the sole source award to Federal Siren Corporation for the purchase and installation of two all-hazard warning sirens. Per the cited code section, Federal Signal has demonstrated itself as a qualified and experience service provider that is available to perform the work and is a single source of expertise or knowledge required. Federal Signal Corporation has provided and installed sirens for Federal, State, and Local governmental agencies throughout the State of Alaska, including Southeast. In addition, with a purchase from Federal Signal Corporation the siren activation will be compatible with the existing Federal Signal siren in the community.

The State of Alaska (MVA) has authorized the sole source award of the project to Federal Signal Corporation.

Please see the attached documents for additional information and let me know if you have any questions.

Respectfully submitted,

Sandra K. Dixon
Fire/EMS Director
