- > Assembly Members,
- > I am emailing with my concerns about age limits of children using the facility without a guardian. I feel strongly that children need to be able to have places that are available to all to test out their independence in incremental steps. Community recreation facilities are perfect places for this! The harm that will come to the healthy development of our young citizens and their already overworked parents will be far greater then some "what if" fear based liability to the city. Instead how about looking for common sense solutions to the issues/concerns that have brought this to be? Put staff in the old office, implement more training for staff and young users, work to create a true community center and DO NOT follow in the steps of bigger cities!!It is important that we fight the tide of overprotective policies that are just there to protect the borough from a lawsuit!
