Re: **350 kW Stand-by Generator Replacement RFP Results**

Six bids were received from our RFP for this unit. Three were deemed non-responsive or disqualified. Of the remaining three, Pacific Power Generation's MTU unit was the lowest priced.

PMPL staff reviewed and ranked the proposals based on price, quality and experience of the supplier, service center, and fuel efficiency. Our conclusion was that the MTU unit is the overall highest ranked. This agrees with the independent review done by the design firm, EPS. Their review is attached.

We are recommending award be made to Pacific Power Generation in the amount of \$97,612. This is approved capital budget item No. 742, line item 000 506551. \$130,000 was budgeted.
