Petersburg Borough
PO Box 329
Petersburg, AK 99833

Attn: The Petersburg Assembly

The Honorable Mayor Mark Jensen & Assembly Members,

My name is John E. Jensen and I am a life time resident of Petersburg, AK. I am interested in re-appointment to the Southeast Alaska Power Agency (SEAPA) board, for the next one-year term of membership. I am currently a member, and have been a member off and on since the divestiture from the Four Dam Pool.

If I am re-appointed, I will continue to work with SEAPA to maintain our common community goals and preserve the interests of the Petersburg Borough.

Thank you for your consideration.

Respectfully,

A handwritten signature in blue ink that reads "John E. Jensen". The signature is fluid and cursive, with a long horizontal line extending from the end of the name.

John E. Jensen

Fellow Assembly Members,

For several years I have contemplated the benefits of the member communities of SEAPA appointing elected officials to the Southeast Alaska Power Agency Board of Directors. Elected officials have their ear to numerous community concerns and always strive to respond promptly to what is best for their communities.

I am requesting your support in my appointment as the Borough's voting delegate to the SEAPA board in 2015. I have been involved with community and regional electric concerns for many years, from divestiture of the Four Dam Pool and formation of SEAPA, to the recent transfer of maintenance and operations of Tyee hydro from the Thomas Bay Power Authority to SEAPA. I know how important affordable power development and maintenance is to the region, but foremost, I want to assure Petersburg's future needs.

As your delegate, I will assure the Assembly is kept informed of all SEAPA actions and projects. I will consult our local electric professionals for guidance when necessary. And, I will always work cooperatively with the member communities, but putting Petersburg's needs as a priority.

Thank you for your consideration.

Mark Jensen

Subject: SEAPA board

I wish to express my interest in serving on the Southeast Alaska Power Association board for 2015. As a retired Forest Service employee, I have been involved in the regulatory and planning process as well as monitoring for hydropower projects including Goat Lake and Kasidaya Creek near Skagway, and Lake Dorothy and Snettisham serving Juneau as well as the electric power generation for Petersburg and the neighboring communities. As a Petersburg assembly member I am concerned about maintaining adequate power generation to serve private and commercial interests; and any economic opportunities that may be realized from excess power sales, when possible.

I have lived in communities dependent on diesel power and understand some of the issues related to high costs of remote power generation and transmission, as well as the desire to develop alternative power sources. I am also interested in establishing efficient organization and an effective and responsive structure as SEAPA transitions away from having an active TBPA board.

Hon. Mayor Jensen

Petersburg, AK 99833

Mayor Jensen:

I've appreciated the opportunity to serve as Petersburg's representative on the SEAPA Board of Directors in the past, and am interested in continuing into 2015.

Thanks you for your consideration.

Joe Nelson, Power Supt.

Re: Letter of Interest

Hello Mayor Jensen,

I am writing you to express my interest to serve the community of Petersburg as a board member on the Southeast Alaska Power Agency (SEAPA). I have been a resident of Petersburg since 1986.

As you may know, I am currently employed by the Petersburg Borough, Petersburg Municipal Power and Light Department. I have been the Powerhouse Mechanic/Plant Operator since 1997, and since 2007 have assumed the role of lead operator or chief operator as it is sometimes referred to. I have taken an active role in assisting with our relicensing process which includes the part 12 inspections, the Emergency Action Plan, the Potential Failure Modes Analysis, the Federal Energy Regulatory Commission (FERC) processes, as well as the FERC annual inspections and annual reporting.

My knowledge of the north end electrical grid, along with the entire SEAPA system would be an asset for the SEAPA Board in looking toward future expansion and existing projects as well as existing system reliability.

Thank you for your consideration.

Respectfully,

Robert (Bob) Ziemke
Petersburg, Alaska
