Subject: Health Mandates

I support the 3 mandates proposed by the Borough tonight. Any economic activity that involves bringing large numbers of individuals to town carries a great risk. Applicable businesses should have solid plans for mitigating risk to the community residents. As for masking up, it is a minor inconvenience, even if not proven totally effective yet. If for no other reason, I would do it out of respect for my neighbors. Thank you to the Borough employees and the Council for being proactive in these unprecedented times where decisions have to be made quickly, often without as much information as we would normally have when dealing with a crisis.

Thank you
Dan Sullivan
