Subject: Mandate # 8

I agree there will be times when a more aggressive approach is needed, but on what grounds are we adopting this mandate? I haven't seen a triggering mechanism established yet by the borough or the assembly that would warrant this action. You are putting the cart before the horse here. My suggestion is to table this until you establish parameter's that are applicable to our borough that would trigger such action. We are unique in so much as we are isolated from the rest of the state, so we should be making our own decision on mandatory masking. As I'm sure you are aware this is a very divisive issue and if your intention is to protect the populace make sure you bring them with you, if you have any questions please reach out, thank you for listening,
