To the Honorable Mayor and Assembly Members of the Petersburg Borough

Having indicated my interest in serving as the Borough representative to the SEAPA board for 2018. I am providing some pertinent background. As a former hydrologist, I have done numerous hydro-logic studies and evaluations related to dam construction and maintenance. In addition, I have participated as part of a team to evaluate two major proposed hydroelectric projects, including the associated transmission lines for the Federal Energy Regulatory Commission.. I have a strong interest in seeing that our electric rates stay low. I also want to see our power infrastructure maintained in top condition with the least disruption of power as possible.

Thank you for your consideration.

Bob Lynn
