Subject: Kake Access Project

To the Petersburg Borough Assembly,

We strongly urge the assembly to approve a resolution opposing the expenditure of more funds on the Kake Access Project. We believe that this project is a huge waste of public funds at a time when money is short at every level of government. We believe this project could be stopped if there is a strong effort put into eliminating the funding for it. This resolution would be an important step in the process of defunding this project. We can not afford to waste 40 + million dollars on a project that has little or no practical benefit for the general public.
