Subject: Mandates

Dear Assembly-

I was shocked to read the Borough is considering additional mandates on our community. At this time we have had one case - It didn't spread.....

With the announcement from the President and our governor talking about the need to reopen businesses I find it appalling that you are even considering additional mandates especially requiring our community to wear masks in public.

Additionally Petersburg is a community over 3,000 with a hospital so Essential service workers are allowed to travel after submitting a Plan to the State under the Governors Mandate - Wrangell and Sitka have tried and failed to fight this. Why waste time and money on this issue?

Many Petersburg residents and small businesses are struggling greatly right now. The additional restrictions on our life are unnecessary and put an additional burden on an already struggling economy and community.

Stop the madness - let's start working towards opening Petersburg up for business - not continuing to shut us down.

Sincerely,
Ambre Burrell
