Subject: Children are the future 🤔 wait what! I mean children pay for the future! No thats not right either 🤔 children get no future! Humm its a conundrum 🤔

Never has the age old adage been more true “ the remedy is far worse than the Disease “ or the way most people truly feel “ the punishment doesn’t fit the crime”

Since we are here again with the ridiculous mask mandate threat! My question for you is, based on what? Our severely lacking in any judgment governor. Used an alert to extend the status quo. Nothing has changed!

As far as I can tell you have even less reason to disrupt our community and ruin our lives than ever before. The evidence against your fear mongering mounts with every case that goes unspread. The fact that maskers are annoyed by their lack of the ability to control others isn’t our problem its theirs. We dont have fits and tantrums and demand they take theirs off. Leave us alone! For crying out loud enough is enough. This ceased to be about health and life long ago.

Even writing this to a willful over bearing assembly who is so partisan it’s pathetic. You all sit there unwilling to listen to the clear majority of this community you claim to serve. It is not your job to make people obey you or live your ideals. It is your job to I dont know fix the damn pool. Or better yet not have let it get into the state it is in in the first place!

Maybe deal with the fact you hired a booby to do a job that clearly needs an education to be done properly! Lets start with actually caring for this community as a whole not just focus on covid covid covid to the ruin of our community and its citizens!

Mostly sincerely
Jennifer Thynes
