Subject: School funding

Good afternoon assembly members, first off I want to thank you for your tireless efforts to our community, it does not go unnoticed.

I am writing in support of awarding our public school district whatever funds they deem necessary to award our children the full education they need and deserve. I understand the need to accommodate all of the fluctuating guidelines, but I assume you will all be in agreement that should we find ourselves in a scenario that schools are shut down, again, this funding will be beneficial in many ways, not just one. This is certainly not a cut and dry, black and white issue at hand, and I appreciate your consideration of the careers of our public educators. I am optimistic that as a whole, we recognize the importance of our public school system, not to mention the safety it provides to many children who do not otherwise experience it.
