Dear Petersburg Borough,

Thank you for the opportunity to explain our opinion regarding the creation of an LID for street paving of Vesta Street.

The advantage of paving the street to reduce the dust generated in our area is obvious and we understand the attraction of that but we do not support the LID for two main reasons.

The first is particular to our situation where we were required to pay the full cost for accessing water and sewer for our second lot that has been in existence for twenty years or more. We do not wish to again be required to pay for services provided to other residents for free nor do we have the ready finances to do so.

The second concern regards the neighborhood in general as we have many preschool and elementary school age children who play outdoors in and around the street. Our subdivision has no playground space provided and so this is the place the children have. When streets are paved people drive faster and there is a very real element of risk of accidents involving children.

Respectfully submitted,

Sharon and Brad Hunter
