**Subject:** Mandatory Rules in Petersburg

I guess the Borough Assembly assumes that most of the people who live Here are really stupid and don't know how to take care of their own health. 500 of Us asked you to stay out of our business and even tho some of you said you would listen to ALL people you did not do that. Instead of listening to hundreds of people you listened to A few people who said what you wanted to hear and made your Truly pathetic power grab and passed a badly written Civil ordinance to control us with threats of huge fines or JAIL or both. If you are having a meeting to discuss mandates you need to invite a large range of beliefs for a true picture of what people think and need.

COVID 19 as with all viruses is 30 times tinier than the mesh in a mask Quote from Dr. Gregg Braden a real scientist. ( he can be heard on YouTube or his many books)

Get your calculators out. As of today's updates the number of people in the world Who have been recorded in contact with COVID-19 or contracted it is not even close to one half of one percent of people Living on the planet. Pretty much same numbers with deaths. Same percentages in America and ridiculously lower than that in Alaska.

There has never been a comprehensive study anywhere at anytime whether masks work. They may be purely psychological for people who have been fear mongered by Big Pharma. Masks are germ and bacteria laden within seconds after putting one on.

Because I trust my amazing, efficient, effective, 24/7 working Immune system I will never be sick so cannot make anyone else sick. Maybe some of you took a break from listening to fear mongering and read or listened to the 1700 doctors and scientists who a few weeks ago on several news services pleading with you to think IMMUNE SYSTEM. Big Pharma has made you distrust this system.

Let all of us decide whether to mask, shelter in place or whatever we think is best for us and for others just like we have done with any virus or sickness for many many years. Let those who want to mask or stay home do so. Only I know how to care for myself. I am 79 years old and extremely healthy. Having Assembly Members tell me what to do And how to stay healthy and well is Arrogant and Ludicrous and Beyond belief.

If you are contemplating making masking Or any other rules mandatory you will tear our community Unity, jobs, respect, love for each other to shreds for years to come.

Much thanks to all assembly members for Contemplating what to do that is right for Petersburg. We appreciate your time and effort.
