Subject: trash collection

I listened to Cris Cotta's overview of trash collection this morning. I am very in favor of recycle continuing and being picked up every other week. I feel this is a good compromise in that it does raise fees minimally but saves us the cost and maintenance of a new truck. I am also greatly concerned about the amounts of plastics being dumped in the ocean and its impacts on sea life, being in a fishing community so I feel recycling is essential. john havrilek
