Subject: Covid testing

I'd like to see assembly pass a testing requirement for people coming into Petersburg whether they're from down south or another Alaska city/town/village. And to require people to isolate until their test results come in. If they tested before they left Juneau or wherever they'll need a follow up here sometime after arrival. Whatever timeline medical People think.

My daughter and family are returning from Juneau mid November and plan to test a few days Before they leave and plan on testing again like 5 days after they get here.   They are healthy but think it's a wise idea.

Please really consider this idea,,, it will also re-I force the message to not be all over the community when they first get here! 😊.

Thanks,

Karen Schramek
