Subject: Covid19 input

1. Yes to face coverings!
2. No to cruise ships unless the passengers actually have had a test that they are covid19 free and have a paper to prove it. Taking temps is pointless since more than half who are carriers don't have temps or other symptoms.
3. It's the same prob with bringing in cannery workers. Cannery workers are in the same position as meat packers or people on cruise ships and we know how that goes, don't we!? Do we want 50-100 cannery workers to get sick? And It only takes one infected cannery worker who sneaks out to get cigs or junk food or drugs to spread it locally.

This whole thing is financially devastating and it's not going to get better anytime soon,,, but let not turn it into a nightmare!!! If nothing else think about how limited our medical staff is here and what it would do to them!!!

Thank you for all your time and effort you put in to making Petersburg an awesome place to live.

Sincerely,
Karen Schramek
