As I read the paper this morning I was encouraged about the council's decision to postpone till September. I thought wow they do seem to have a consideration for the views of the WHOLE community. Yet now I feel as if it was a superficial way to appease yet still achieve your own will. more government has never proven to be better for the people. Why does the borough need such power and why do you insist to grab it while so many families are in their busiest times trying to provide and cannot keep up with new laws that seem to come every week from a few.
