

Good afternoon,

Please see attached for the updated In-Kind service letter for the Petersburg CAP 107 Navigation Improvements Feasibility Study. I have increased the Borough's In-Kind contributions to \$100,000 due to the addition of four environmental sampling efforts necessary for determining an in-water disposal location for the project. To date, the Borough has provided the full cash contribution of \$270,000 and an additional \$32,349.11 in In-Kind services.

Please let me know if you have questions.

V/r,

Amber Metallo  
Biologist/Planner
